

GATEKEEPER for LAW ENFORCEMENT

Law enforcement's intelligent key for instant access and auto-locking.

GateKeeper Enterprise makes it easy to manage user access across your network.

More coffee, less typing. Using state-of-the-art software and hardware, GateKeeper gives police the freedom to focus on their jobs while we let them access their computer and web applications without typing passwords.

- ✓ Hands-free 2-factor authentication for every user.
- ✓ Exceed CJIS compliance standards.
- ✓ Real-time user location and login activity monitoring.
- ✓ Increased efficiency for better outcomes and productivity.

Tired of having the MDC lock while driving after timeout? End computer access frustrations with GateKeeper's proximity-based authentication.

CJIS compliance simplified for police and correctional facilities.

Never forgets to lock. No need to lock your computers every time when we got this one. GateKeeper does it for you so you're compliant. It will also log you in quicker upon return. Be secure without worrying.

- ✓ Dramatically reduce the chance of insider data breaches.
- ✓ Cutting-edge technology to keep you compliant while you work.
- ✓ Tight IT budgets are not an issue. GateKeeper can perform several access control and authentication jobs with ease.
- ✓ Let GateKeeper follow the rules for you.

PROXIMITY ACCESS TO MDC

Keep your MDCs locked or unlocked with proximity, preventing annoying time-outs while driving.

DEFENSE-IN-DEPTH SECURITY

GateKeeper goes beyond standard 2FA with multi-modal login/logout methods paired with wireless technology.

WORKS AUTOMATICALLY

GateKeeper's hands-free design works in the background, making secure computer logins an afterthought.

REAL-TIME LOCATION & REPORTING

Know exactly who accessed each computer in real time. Audit records of computer access is automated by GateKeeper.

"GateKeeper saves computer security from breach as soon as a user leaves the immediate area as well as saves any lost work time logging on and off computers. Personal security is also greatly enhanced by the automatic lock and unlock capability based on proximity."

GateKeeper Enterprise: The key to secure access in law enforcement.

GateKeeper is the most seamless authentication solution that combines security and efficiency into one system to help Public safety departments meet compliance policies/mandates and provide valuable intelligence.

Problem	Feature	Solution	Benefit	Stakeholders
Lack of security at the MDC workstation	Enhanced, Seamless Security	Prevents officers from leaving sensitive data open when they leave the MDC workstation	Helps to protect the department from breaches and data exposure that could result in fines, penalties or loss of reputation	IT, Security Team
Department would like to increase efficiency	Touchless Authentication	GateKeeper unlocks machines when a user approaches, saving time with: <ul style="list-style-type: none"> • overall authentication process • forgotten passwords • mistyped credentials 	The department has more time to devote to productivity, which increases output.	Employees
The department does not meet compliance standards/policies	Individual Authentication	The department no longer needs to use shared passwords and can meet compliance needs such as CJIS Advanced Authentication.	The department doesn't have to worry about being penalized in an audit.	Compliance Officer, IT
The department wants more information about how officers spend their work days	Business Intelligence Reporting	GateKeeper tracks the motion behavior of officers during the workday, the amount of time spent on the MDC workstation, and their pattern of movement throughout the office	The department can make profitenhancing decisions using the time and motion data gained from using GateKeeper	Operations, Administration

FEATURES & BENEFITS

- Automatic lock (100% security).
- Fast login with optional 2-factor authentication.
- Regulatory compliance (e.g. HIPAA, HITECH, CJIS).
- Centralized credentials management.
- Richly detailed audit logs for workplace optimization and security audits.
- Web-browser based user interface.

CENTRALIZED MANAGEMENT

- Many-to-many matching of GateKeepers to computers.
- Group computers/users according to access control needs.
- Revoke/delete GateKeeper credentials from the server admin console.

AUDIT LOGS FULL OF RICH DATA

- Powerful analytics to measure efficiency and time secured.
- Detailed access logs from each GateKeeper-enabled computer.
- Identify users even on shared computers.
- Filter data based on GateKeeper credentials, computers, and activity.

SPECIFICATIONS

- Client software supports Windows devices with Win 7, 8, 8.1, 10, and Mac OSX version 10.13 or above.
- Enterprise Hub requirements: Windows Server 2012 & SQL Database
- Adjustable range from inches to 30 feet.
- State-of-the-art AES256 encryption to secure credentials.
- Fastest login and logout technology for police.
