

## Approach your MDTs with your new password caddy.

### PROXIMITY LOCK AND UNLOCK

Login and out seamlessly with your presence.

#### WITH GATEKEEPER

#### BEFORE GATEKEEPER

##### PC automatically authenticates you.

Fastest login time. No more typing long, mandated passwords. Typing credentials is eliminated.

##### Type a long, mandated password.

Sometimes you forget your password, sometimes you mistype—especially when driving.

##### MDT never locks while you're driving.

When next to your MDT, it will continue authenticating to keep you logged in—never locking while you're working.

##### Timeout locks your PC while driving.

You should never have to stop working because a timeout policy locks you out of your PC.

##### All passwords auto-fill on websites.

No more typing usernames and passwords on any website. Your passwords will be available on any computer you use.

##### Log in again, every time you move computers.

Remember credentials, type username and password dozens of times a day.

##### 100% rate of correct password inputs.

Automated passwords never fail and are never incorrect. Save lots of time.

##### Mistype and get locked out often.

No more getting locked out, forgetting passwords, and weak passwords.

##### Automatically locks MDT when you leave.

Automatic lock when the user leaves—minimizing the threat window drastically.

##### Must remember to manually lock computer to meet CJIS compliance.

Locking the MDT is a requirement, but with so much going on, it's too easy to forget.
