

USB SENSOR SETUP

GateKeeper Enterprise

GATEKEEPER

1. Make sure your token is in line of sight with your USB sensor on your computer.
2. We encourage you to use two USB sensors: one under your desk and another on the side of your monitor. If you're using a laptop, then put the second USB on the side of your laptop.
3. Use an extension cable to get the sensor into the best position.
4. Link to [Knowledge Base articles](#) for more information.

Side of Monitor

Best for: When your token is on a **lanyard** or a **badge holder**.

Under Desk

Best for: When your token is in your **pocket** or on your **waist**.

On your Desk

Best for: When your token is on your **table**.
