

Creating the Ultimate Workflow Experience

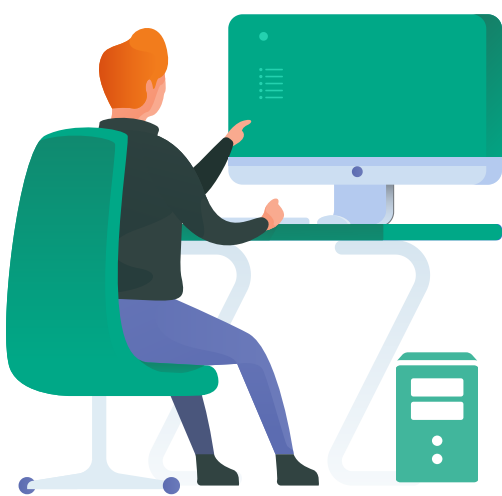

3 Ways to Level Up with GateKeeper

Maximize efficiency potential by turbo-charging your employees' password handling capabilities across the organization.

#1

Enforce complex passwords without hassle

Share password with users through GateKeeper.

Change password to something crazy complex.

Users login with new changed password.

#2

Shared workstation authentication

Login to shared workstations using shared accounts but while retaining clean audit trails of which user actually logged in.

#3

Automate password changes

Set your Windows passwords to automatically change on predetermined intervals.
