LOCK RANGE HACK:

LOCK FASTER WHEN LEAVING

1

PROXIMITY LOCK RANGE to: "Close (6 - 12 feet)"
Great for small environments where you want to lock the PC ASAP.

2

Set DELAY PROXIMITY LOCK to: "O Seconds"
Set the computer to lock instantly when your token is out of range.

3

Set MOTION SENSITIVITY to:
"HIGH"

Lets the system know you're

Lets the system know you're leaving and the PC will lock quicker.

4

Set SIGNAL QUALITY BIAS level to: "-10"
This makes it so that the token seems farther more quickly, resulting in a faster lock.
